

HELLO! My name is Isabel and I'm a creative leaping into tech. After many years in the art world focusing on sculpture, ceramics and digital design, I'm now taking a step in a new direction. At the moment I'm studying Frontend at Hyper Island, where I'm really enjoying learning all the ways to communicate — using different languages to create interesting, accessible products.

I'm naturally curious and detail-oriented, and I love the moment when an idea finally comes together. I bring that same patient, hands-on approach I learned in the studio to everything I build: I like to understand the why behind a design, not just the how. When I'm not coding, I'm probably making something with my hands or chasing after my two-year-old daughter.

EDUCATION

Hyper Island, Stockholm

Frontend Developer - YH 2025-2027

Right now at Hyper Island I am learning how to create user experiences in web and apps using HTML, CSS, JavaScript, React and a variety of different tools and languages. The school's approach to hands-on learning and focus on teamwork really align with the kind of developer I want to be.

Konstfack, Stockholm

Bachelor of Arts - Ceramics and Glass 2018–2021

During my time at Konstfack I learned the fundamentals of ceramic craft, glass blowing and history of arts, design and crafts. I also learned how to take a project from an idea to collaboration, execution and then presentation. While the school focused a lot on artistic development, techniques and theory, the school also gave an unique insight and training in project management, the economics of a creative project and how to collaborate with design brands, public agencies and galleries.

SKILLS

Technical

HTML, CSS, JavaScript - React -
REST APIs - Git

Design & UX

Accessibility - Information
hierarchy Usability testing - UX
writing
- User research

Working Methods

Agile ways of working -
Stakeholder communication -
Data-driven decision making

PROJECTS

MENU MAKER

React, JavaScript, REST API

GITHUB:

[GitHub - tegstroem/Menu-maker](#)

LIVE PREVIEW:

<https://tegstroem.github.io/Menu-maker/>

Built a React-based web application that helps users to build personalized weekly menus by creating recipes, dragging them into a weekly planner, and saving their favorite menu combinations. Recipe inspiration comes from the TheMealDB API, so there's always something new to try. The user can either search for recipes from the API or enter their own ideas for the menu. Everything is stored locally in the browser, and the interface is fully responsive with custom styling.

TREND WEAR APP

HTML, CSS, JavaScript

GITHUB:

[GitHub - tegstroem/Code-and-Collaborate-1](#)

LIVE PREVIEW:

<https://tegstroem.github.io/Code-and-Collaborate-1/>

Collaborated in a team to build a responsive e-commerce web-application. The project focuses on creating a simple shopping experience where users can browse products, view sales, and add items to a favorites list. This project was built as part of a Hyper Island course with a strong focus on Agile workflows, UX design, and collaborative frontend development.

MIIWA NORDIC AB

WixStudio, Figma

LIVE PREVIEW:

<https://www.miiwa.com>

Client collaboration with Hyper Island and Miiwa Nordic AB. The website is created with Wix Studio and Figma. My contributions included being the main client contact person, collaborating on the design and implementing the design in Wix.

EXPERIENCE

NYTIDA/ Assistant Coach

DECEMBER 2021 – AUGUST 2025 [Stockholm Globen](#)

My role at Nytida involved supporting participants with learning disabilities and autism in their everyday lives and planning and leading activities. The activities could vary between art and culture, movement and training and internships with companies both internally at the unit and on site, we worked with companies such as SELLPY, Eldstickan, Aldrig Ensam and Normal.

Ceramic & Visual Artist / Selfemployed

SUMMER 2021 - [Stockholm](#)

As an artists I have developed an practice around earthy materials and digital methods. Creating ceramic sculptures, spatial installations, and graphic artworks. I have produced exhibitions around themes and collaborations, coordinate logistics for large-scale ceramic and spatial works. As a graphic artist I have created digital artworks for several Medel Collective - 50x70 digital art exhibitions and created graphic design for marketing art Exhibitions, both outdoor advertising campaign and on social media.

Member of ceramic studio collective Drömhästen

SUMMER 2021 - [Stockholm](#)

After graduating my BA I created a ceramic studio collective called Drömhästen with fellow artist classmates. I contributed to studio operations, including workspace management and kiln scheduling, participated in group critiques and creative development sessions and collaborated with fellow artists on shared studio projects and exhibitions.

Växjö Konsthall/ Art Educator

FEBRUARY 2017 – MAY 2018 / PART-TIME

Lead the "Konstlabb-lördagar" for children within the ages of 5–12 years. Where I planned and implemented art educational activities based on current exhibitions at Växjö Konsthall.
